

Dr. med. Karin Hellerhoff *Dr. med. Beate Jauernig* *Dr. med. Anikó Sztrókay-Gaul*

**DEAR PATIENTS,
DEAR RELATIVES,**

welcome to the Breast Imaging Department in our Women's Clinic. If you have a suspected breast tumour, you above all wish for clarification about your situation and understanding and sensitive guidance during this worrying time. We offer modern imaging techniques and careful diagnostic procedures provided by an experienced team.

As an integral part of the certified Breast Centre at the Red Cross Clinical Centre, Munich, we meet the requirements for the highest level of diagnostics and therapy. As we are the largest establishment of this kind in Germany, you can trust our many years of experience. We work together with other departments of our clinic to achieve a common goal: to make sure that you get better soon.

Kind regards,

Dr. med. Karin Hellerhoff
Chief Radiologist

Dr. med. Beate Jauernig
Senior Physician

Dr. med. Anikó Sztrókay-Gaul

RANGE OF SERVICES

OUR SERVICES

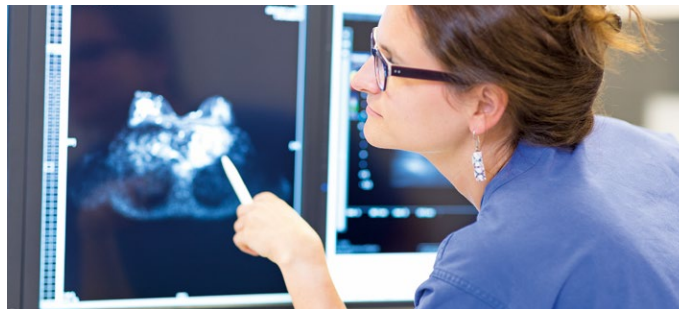

In our certified centre, we offer all modern imaging procedures such as mammography, tomosynthesis and ultrasound in line with the latest medical standards. If necessary, we can also perform magnetic resonance imaging and minimally invasive biopsy procedures.

If you have a condition that requires therapy, you will be advised individually and will be directly involved in the diagnostic approach.

We will be happy to obtain a second medical opinion for you to ensure that you receive a suitable diagnosis and treatment plan.

WOMEN FOR WOMEN

Personalised and considerate care represent a mainstay in our clinic. Our patients are looked after by an all-female team.

COMPREHENSIVE CARE

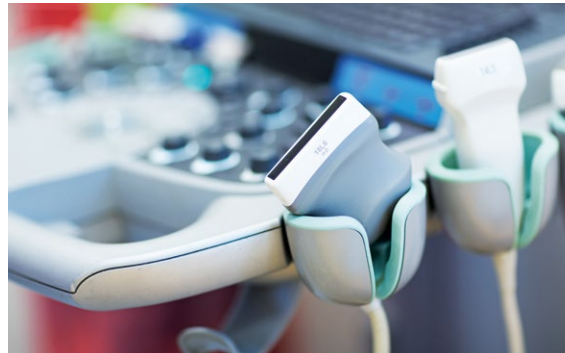

We will provide you with comprehensive care in the event of an illness requiring therapy. With rapid, careful diagnostic clarification and in close collaboration with the specialist areas of the Breast Centre. As one of the leading institutions in Germany, we also act as a consulting unit for the German Mammography Screening Programme.

INFORMATION FOR MEDICAL COLLEAGUES:

You can also contact us by telephone if you have any specific questions or if you would like to send a patient to us for further examination.

We provide:

- Digital full-field mammography
- Stereotactic vacuum-assisted biopsies
- Sonographic vacuum-assisted biopsies
- State-of-the-art ultrasound diagnostics
- Tomosynthesis as a three-dimensional mammography procedure
- MRI-guided clip/wire placement
- MRI-guided vacuum-assisted biopsy

INTERDISCIPLINARY BREAST CENTRE

Our Breast Centre is one of the leading establishments in Germany based on the number of patients suffering from breast cancer that have been treated by us. Experience, highly-modern technical equipment and fast and careful minimally-invasive clarification are what is required for an optimal, individual treatment plan. Our close cooperation with the specialist disciplines of gynaecology, pathology, oncology, nuclear medicine and radiotherapy gives you, as a patient, peace of mind.

THE NETWORK – CROSS-DISCIPLINE COOPERATION OF ALL AREAS
